- Organization Change Management
- ERP/Applications Expertise
- Technical Architecture

Strategic Staffing

Leverage high demand, low supply resource for interim time period.

Interim Leaders

- Program and Project Management
- Industry Subject Matter Experts
- Executive Pro-Tem

Case Study – Public Sector

Quick Win Project

Lehigh University recognizes the national energy talent crisis and associated costs have demonstrated the need to develop new education programs in Smart Grid Technologies. Lehigh University and University of Pittsburgh have proposed to establish a network of graduate Smart Grid “Fellows” to build a community of scholars who can communicate Smart Grid research to the community colleges and K-12 community and the broader public.

As part of this effort, a lessons-learned approach has been taken. Once underway, XBIG6COM, LLC will evaluate the program and formulate a lesson's learned white paper to address future employment expectations by the industry.

Case Study – Airline Industry

Staff Augmentation

A major Canadian Airline needed temporary, immediate assistance staffing their non-revenue, travel booking desk. XB IG6COM, LLC provided a Senior Director industry expert who identified and recruited experienced reservations analysts. Within a three-day period, the client was staffed and running with a 30-person inbound call center capability.

Initial scope of work was for three weeks, from 8:00 am to 10:00 pm Central Standard Time, seven days per week. The work was subsequently extended with a broadened scope of work – the effort received accolades from the client and the client's employees.

Case Study – Energy Sector

Strategic Staffing

The American Gas Association (AGA) and Edison Electric Institute (EEI) are two leading not-for-profit utility industry groups, both based out of Washington, D.C. XBIG6COM, LLC was invited to provide new insight to a group of several dozen organizations during a three-day industry conference. The group was interested in trends in Human Resources and how those trends might apply to their business.

An industry Subject Matter Expert (SME) and Human Capital manager initiated a research effort over a two-month period, including reaching out to over 1,500 knowledge workers in a variety of industries through an online survey. Subsequent findings and results were assembled for final presentation to 80 utility leaders representing small, medium, and large organizations throughout the US and Canada.

Why Us

- 
- Think-Power of Top-Tier Firms
 - Flexibility of a Boutique
 - Cost of an Independent

Our consultants have an average of ten years (two year minimum) experience at one of the leading US or worldwide consulting organizations. We have helped solve some of today's most complex business and IT problems. We have applied "Big-Six" thinking to ourselves and assembled a business model to offer our clients the Think-Power of these well-respected firms, while being ultra-flexible to our client's needs – and at a significantly lower cost.

Same smart people – half the cost™
